

Freddox Tank Pump Si-1800

The Freddox 2ltr tank pump is an all purpose, multi-talented tank pump.

Suitable for air conditioning systems & heating boilers this pump is an ideal van stock item.

Supplied c/w non return valve

- 4 x 30ml Inlets
- Low sound level - quiet operation
- Easily removable tank & reversible pump
- Oil & Acid resistant
- High discharge head of 5 mtrs
- Reinforced construction - improves shock resistance
- High flow rate - shorter running time = lower running costs.
- Easy to remove check valve suitable for 3/8" or 1/4" pipe
- 4 fixing points provide several mounting options such as against a wall or hanging from a ceiling.

Technical Data

Sound Level, pumping = 45dBA
@ 1mtr

Max. condensate temperature : 65°C
(80°C in short peak)

Max. condensate acidity : pH>2.5
(Gas condensing boilers)

Max. discharge head : 5.0 m

Max. flow rate : 500 l/hr

Tank Capacity : 2ltr

PART NUMBER: 71100
